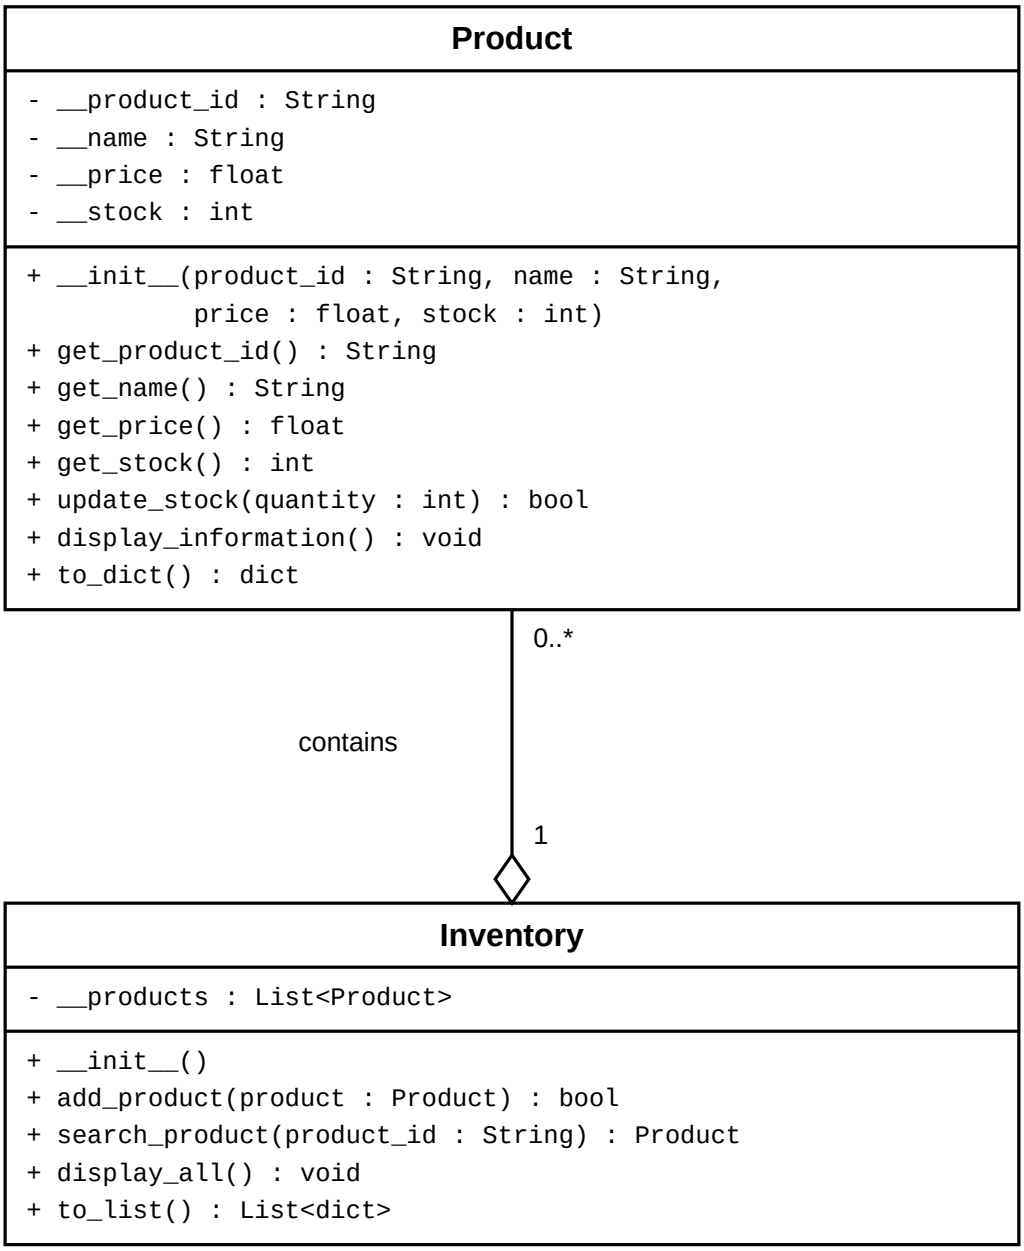
UML Class Diagram - OOP Inventory Management System

INF1103 Lab 6



Notes

- private attribute/method (name-mangled with __ in Python) + public method
Hollow diamond = aggregation: one Inventory holds zero or more Product objects;
Products can exist on their own before being added to the Inventory.
search_product() returns None if no product matches the ID.
update_stock() returns False if the quantity is invalid (negative or not an int).
